GenAI on Cloud: Azure, AWS & GCP

Build on Azure AI Foundry, Amazon Bedrock and Vertex AI.

DURATION	FORMAT	LEVEL	LABS
32 hours	Onsite, online or hybrid	Intermediate	Cloud sandbox included

About this programme

Build and deploy GenAI applications on the three major clouds using their managed model platforms — with the security, networking and cost controls enterprises need.

Who it is for: Cloud engineers, solution architects and developers

What your team will be able to do

- Choose between Azure AI Foundry, Amazon Bedrock and Vertex AI for a workload
- Deploy models and build RAG and agent applications with managed services
- Apply enterprise security: private networking, identity and content filters
- Estimate and control GenAI costs in production

Before you start

- Hands-on experience with at least one of Azure, AWS or Google Cloud
- Working Python and REST APIs

Course outline

We send the module-by-module outline with your proposal, adapted to your team's tools and goals.

Assessment and certification

How learning is checked

- A short knowledge check on day one and again at the end, so you can see each person's progress
- Graded hands-on labs in every module, reviewed by the trainer
- A final exercise that applies the programme to a problem like your team's own

Certificate and exams

- Participants who complete the programme receive a Cognitive Networks AI certificate of completion.

Formats and cohort size

- Onsite: At your office or a venue you choose, in full days.
- Online, live: Instructor-led over video, usually in half-day sessions so people can keep up with work.
- Hybrid: Some days in a room together, the rest online. Useful when a team works across cities.

Cohort size: 15 to 25 people per trainer. Larger teams run as parallel cohorts on the same outline, so everyone learns the same thing.

Pricing: We quote per cohort, based on duration, format and number of cohorts. There is no per-seat price list: tell us your team and we send a proposal within one business day.
