Palantir Foundry Practitioner: Pipelines, Ontology & Operational Apps

Three hands-on days building on Foundry: governed pipelines, an Ontology, Actions, Functions, Workshop apps and AIP.

DURATION	FORMAT	LEVEL	LABS
24 hours	Onsite, online or hybrid	Intermediate	Cloud sandbox included

About this programme

A three-day workshop in which participants build a complete solution on Palantir Foundry: connecting enterprise data, engineering governed pipelines, modelling an Ontology, adding Actions and Functions, and delivering Workshop applications. A smart-manufacturing scenario runs through all three days, with AIP used to add LLM-backed logic where it helps. The programme closes with APIs, security, production readiness and an integrated capstone with assessment.

Who it is for: Data and analytics engineers, developers, solution architects and implementation leads building on Foundry

What your team will be able to do

- Connect enterprise sources and build governed pipelines with Pipeline Builder and Code Repositories
- Model an Ontology of objects, links and properties backed by datasets
- Implement Actions for controlled writeback and Functions for reusable business logic
- Build Workshop applications and integrate external systems through REST APIs and the Ontology SDK
- Add AIP Logic to an Ontology-backed workflow with permissions and human review in place
- Prepare a solution for production with monitoring, security controls and runbooks

Before you start

- Working SQL and basic Python
- Access to a Foundry environment provided by your organisation or arranged with us

Course outline

We send the module-by-module outline with your proposal, adapted to your team's tools and goals.

Assessment and certification

How learning is checked

- A short knowledge check on day one and again at the end, so you can see each person's progress
- Graded hands-on labs in every module, reviewed by the trainer
- A final exercise that applies the programme to a problem like your team's own

Certificate and exams

- Participants who complete the programme receive a Cognitive Networks AI certificate of completion.

Formats and cohort size

- Onsite: At your office or a venue you choose, in full days.
- Online, live: Instructor-led over video, usually in half-day sessions so people can keep up with work.
- Hybrid: Some days in a room together, the rest online. Useful when a team works across cities.

Cohort size: 15 to 25 people per trainer. Larger teams run as parallel cohorts on the same outline, so everyone learns the same thing.

Pricing: We quote per cohort, based on duration, format and number of cohorts. There is no per-seat price list: tell us your team and we send a proposal within one business day.
