Responsible AI & Governance

EU AI Act, India's DPDP Act, ISO 42001 and model risk controls.

DURATION	FORMAT	LEVEL
16 hours	Onsite, online or hybrid	Advanced

About this programme

Build a practical responsible-AI and governance programme: the regulations and standards that matter for Indian and global enterprises, risk classification of AI use cases, and the controls, documentation and oversight that auditors and customers expect.

Who it is for: Risk, compliance and legal teams, AI leads and architects

What your team will be able to do

- Map your AI use cases to the EU AI Act risk tiers and India's DPDP Act duties
- Stand up an AI management system aligned to ISO/IEC 42001
- Run AI impact assessments and maintain model documentation
- Define oversight, monitoring and incident processes for AI systems

Before you start

- No technical background needed
- Familiarity with your organisation's risk or compliance processes

Course outline

We send the module-by-module outline with your proposal, adapted to your team's tools and goals.

Assessment and certification

How learning is checked

- A self-assessment before and after the programme
- Case work, role-plays and exercises with feedback from the trainer
- A personal action plan that each participant presents at the end

Certificate and exams

- Participants who complete the programme receive a Cognitive Networks AI certificate of completion.

Formats and cohort size

- Onsite: At your office or a venue you choose, in full days.
- Online, live: Instructor-led over video, usually in half-day sessions so people can keep up with work.
- Hybrid: Some days in a room together, the rest online. Useful when a team works across cities.

Cohort size: 15 to 30 people per trainer. Larger teams run as parallel cohorts on the same outline, so everyone learns the same thing.

Pricing: We quote per cohort, based on duration, format and number of cohorts. There is no per-seat price list: tell us your team and we send a proposal within one business day.
